

## PREVENTS THE FORMATION OF ICE DAMS

Calorique's *PerfectlyClear™ Roof De-ice* is the most advanced ice dam prevention solution on the market today. Our unique heating panels feature a thin profile. When installed, they are completely concealed underneath the asphalt shingle. The heating panels are available in various standard lengths to provide for any configuration.

The modular design allows the roofing contractor to easily plug heating panels together positioning them in and around problem areas. The panels are easily installed as a "Retro Fit" under existing shingles, or at New Shingle Installation. Our products provide ice dam prevention for valleys too.

Installation is easy – By removing the underside release liner and firmly pressing down, the heating panel locks securely in place. Removing the top release liner strip, seals the panel to the next course of shingles. Simple, fast and easy!

*PerfectlyClear™ Roof De-Ice* combined with *PerfectlyClear™ Gutter and Downspout Heat Ribbons* plus an optional automated controller/snow sensor, protects buildings against dangerous ice build-up – safely and efficiently.

Concealed Radiant Heat Panels installed under asphalt shingles

## ROOF De-Ice

### FEATURES

- Prevents Ice Dams
- For New and Existing Roofs
- Completely concealed under shingle
- No Nailing Required
- ETL Intertek Listed
- 15 Year Limited Warranty
- Certified to withstand 110 MPH winds
- Completely Waterproof
- Easy to install
- 120V and 240V
- 10 Watts per linear foot
- Maintenance free

### SPECIFICATIONS

- Thickness: <0.150"
- Flammability Rating: 5VA (UL94)
- Weight: 7oz/ft.
- In compliance with UL499, ETL Listed
