

PREVENTS SNOW AND ICE BUILD-UP IN GUTTERS AND DOWNSPOUTS

Calorique's *PerfectlyClearTM* Heat Ribbons are essential for keeping gutters and downspouts clear of icicles and snow. Due to our amorphous metal heating technology, installing and operating gutter and downspout ice/snow melting heating systems is practical and affordable. Our de-icing ribbons help you stay safe and can help reduce liability for both residential and commercial buildings.

Easy to Install, our robust heating system is designed for outdoor exposed environment applications for gutters and downspouts and to be used in conjunction with our *PerfectlyClearTM Roof De-Icing Systems*. This product is manufactured with UV and FR additives to withstand sunlight exposure and resistance to fire. No need for multiple runs of our robust heating ribbons in a 4" to 6" Gutter – just one pass does it all !

PerfectlyClearTM Gutter and Downspout Heat Ribbon kits consist of the basic heating element customized and ready for installation. The mounting hardware contained in the kit is made of corrosion free metallic clips for anchoring the cable.

PRODUCT #	WIDTH	LENGTH	WATTS	AMPS
GH15-200W120V	1.25"	15'	200	1.85

PerfectlyClear™ by Calorique Gutter and Downspout De-Icing System

PerfectlyClear™ Gutter and Downspout Heat Ribbons are easy to install! Installation instructions and warranty registration are included in each kit.

Easy Installation Steps

1. PerfectlyClear™ Gutter and Downspout Heat Ribbons are designed to be hard wired.
2. Determine the length of the area to be heated and sketch your layout. Include the location of the power source in your diagram.
3. Power connections should be installed in a protected area
4. Clean the gutter and downspout from any debris before installing your PerfectlyClear™ Gutter and Downspout Heat Ribbons.
5. Begin the installation at the power connection, and unroll the product.
6. Anchor gutter cable with included clips as necessary.

Flexible – Bends easily

Clips in place

Contours

90° angle turns
